

# Northeast Thermography Medical Imaging Center

*Cutting Edge Technology for Early Disease Detection*

## Welcome to Northeast Thermography Medical Imaging Center!

### What you can expect of the process

- 1) You will be greeted and shown the private imaging space. Then you will change into a medical gown.
- 2) Your medical health questionnaire will be reviewed while you are getting changed.
- 3) While your body is acclimating to the temperature in the imaging space (68 – 72°F) we will discuss the questionnaire WITH you and enter information into the imaging software. (Expect 10 – 20 min).  
We may take notes and research natural solutions to your unique health history. You will receive a copy before you leave. When all information has been entered into the computer, you will remove your gown, sit on the stool and face the imaging camera.
- 4) Imaging will begin.
  - a. Full Body (45 min)
  - b. Base Health Screening (30 min)
  - c. Region of Interest (15 min)
- 5) After imaging is complete, you will change back into your own clothes.
- 6) Staff will review any notes taken WITH you and share any natural solutions identified during your health history review.
- 7) Payment is collected and you receive a receipt for your study.
- 8) For first time clients, we will set an appointment approximately 2 weeks out for your report review.
- 9) At the report review, we discuss any findings / recommendations noted in the doctor's report. You will receive a hard copy and an electronic version of your report.

2 Chelsea Place, Clifton Park, NY 12065
